

PDF Merger

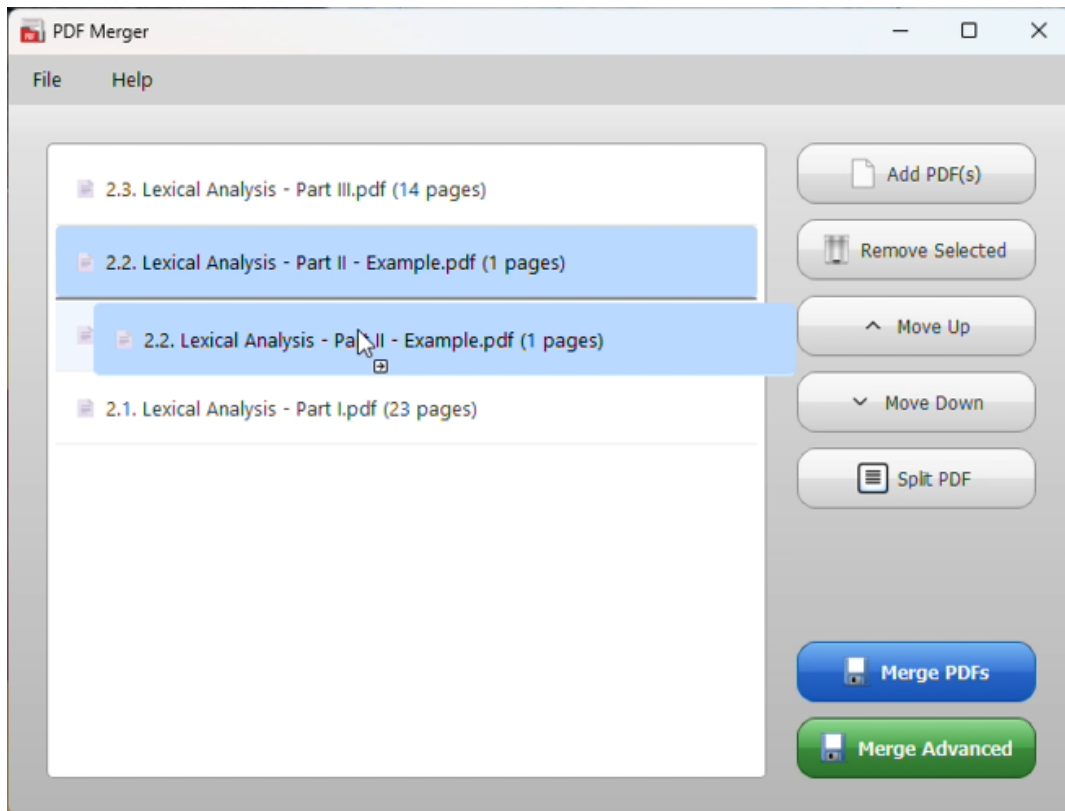

v1.0.0

The PDF Merger helps you to split, re-order and merge pdf files.

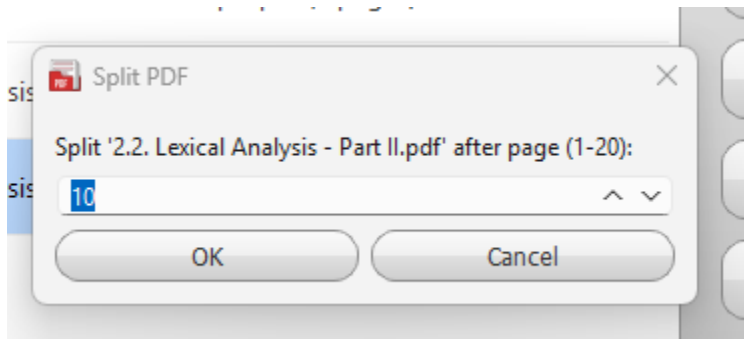

How To Use

1. Click on Add PDF(s) button and select the pdf files to open.
2. Once opened, you use move up and down buttons to re-order the pdf files as you need.
You can also use the mouse and drag pdf file to re-order.

3. If you want to split a pdf to parts, use the “Split PDF” button, and give the page number to split the pdf. Then click OK.

Eg: If you want to split the pdf from page 1 to 10 as one part, then 11 to 20 as another part, give 10.

4. After editing, click on Merge PDFs button to save the final pdf file.

Advance Merge Option (Experimental)

1. PDF Merger supports advance merge option, which you can change the pdf layout and order multiple pages together. This option is not fully completed.
